

+Web 2.0 - Inventory Management Solution

V-One is fast becoming the solution small and medium businesses select for managing business operations. The unique process driven approach of V-One ensures that your existing staff can use V-One with little or no extra training.

V-One Inventra helps simplify the complexity of inventory management by mapping to the existing process of an organization thereby allowing the system to track materials from the time they enter into the system till they leave the system addressing the key challenges in a simple yet comprehensive manner. Because the system is accessible over an internet browser, V-One helps integrate the factory, ware-house and different branch locations providing a one-view of the stock.
