<b>Job Title</b>	SOFTWARE DEVELOPMENT ENGINEER
<b>Job Location</b>	Visakhapatnam or Hyderabad
<b>Posting Date</b>	SEP 19,2008
<b>Closing Date</b>	OCT 18,2008

**Sankhya**

Sankhya Technologies is a software research and development company based in India. Sankhya offers software engineers long term careers in areas like system software, compiler design, distributed computing and embedded systems.

SANKHYA Consulting offers cutting-edge solutions that are an effective mix of technology, consulting and outsourcing.

**Education and Experience**

A bachelors degree in computer science engineering with distinction from a reputed university.

**Specialized Skills**

SANKHYA Consulting is looking for passionate software development engineers with a good exposure to C++ programming as well as solid understanding of basic computer science and software engineering concepts.

Professional experience of 2+ years in developing test cases for compilers /simulators /debuggers/ system software on Microsoft Windows is a must. Familiarity with .NET Framework, C#, JavaScript/ JScript and Windows batch files will be a plus.

**Job description**

As a software development engineer (testing) you will create test plans, develop test cases/frameworks, perform testing and create test reports. Proven skills in white box testing, debugging complex code, and validating complex systems are essential.
